
THE ARLEY CONSULTING COMPANY LIMITED

Arley Consulting Awarded Top Health & Safety Accreditation

We are pleased to announce that Arley Consulting has received accreditation from SAFEcontractor, a programme which recognises very high standards of health & safety practice amongst UK contractors.

Arley Consulting is one of the latest group of successful companies to join a leading edge scheme, designed to help industry improve its safety record.

The Company's application for SAFEcontractor accreditation was driven by the need for a uniform standard across the business.

SAFEcontractor accreditation is expected to enhance the Company's ability to attract new contracts and its commitment to safety will be viewed positively by its insurers when the company liability policy is up for renewal.

Martin Lovelock; Technical Director of Arley Consulting said, "this is a fantastic achievement for the Company, all staff have embraced the new scheme which helps to provide a safer place to work for ourselves as well as our contractors".

Darran Hughes; Operations Director of SAFEcontractor said, "major organisations can no longer run the risk of employing contractors who are not able to prove that they have sound health & safety policies".

"More companies need to understand the importance of adopting good risk management in the way that Arley Consulting has done. The firm's high standard has set an example, which hopefully will be followed by other companies in the sector".

Under the SAFEcontractor system, businesses undergo a vetting process, which examines health & safety procedures and their track record for safe practice.

These companies meeting the high standard are included on a database, which is accessible to registered users only via a website, www.safecontractor.com.

Employers and organisations who sign up to the scheme can access the database, which enables them to vet potential contractors before they even set foot on site. These employers agree that, as users of the scheme, they will engage only those who have received accreditation.

Over one hundred and twenty major nation-wide businesses, from several key sectors, have signed up to use the scheme when selecting contractors for services such as building, cleaning, maintenance, refurbishment or electrical and mechanical work.
